It also contains other documents that the CAG asked for that may not be in ours, CCoD's or CDPHE's websites. The CAG does not have restricted access to OneDrive. They can see all the documents placed in the shared folder. The OneDrive however is not freely accessed by the general public. Freely accessed documents are in our website.

Jesse, hasn't it been the case that the one drive was for draft documents that they wanted to see related to the removal action? That's why they have restricted access?

I will not add the deletion documents to OneDrive. I have not granted access to select individuals. I always granted access to CAG members. All the current CAG members have access to the OneDrive folder. I asked Kim for a list of the current CAG members at the end of September and granted access to those addresses. Here is the list:

Ex. 6 Personal Privacy (PP)

Ex. 6 Personal Privacy (PP)

I also added CCoD and CDPHE personnel.

Hi Jesse – In keeping with Mark's statements below, let's not add anything new to the OneDrive folder at this time. While it may be the case that we have shared some of the documents supporting the NOIPD with the CAG, I don't want to compromise the deletion process by preferentially sharing the exact and complete set of documents supporting the NOIPD with the CAG.

With regard to the OneDrive folder, just so I'm clear, have you granted access to select individuals, and if so, to whom?

Thanks,
Steve

I can add the NOID related documents to OneDrive. The details of the investigation are in the Phase I, II and III/RI. For close to a year the CAG has had access to the 2001 RI, 2001 risk assessment, 2003 ROD, 2008 Final Site Report, 2014 Explanation of Significant Difference, 2014 Five Year Review, 2016 Final institutional control implementation and assurance plan, 2017 Final Remedial Report, property database, the lead consult and the maps showing the spread of the contaminants.

As for the AR collection it will take me some time to go through them to figure out which was the one.

Jesse

Subject: VB/I-70 CAG meeting tonight!

Hey all. Steve and I are heading to a VB/I-70 CAG meeting tonight where we will be engaged in a lively discussion regarding the deletion of OU1. In preparation, it would be helpful if we were ready with answers to the following:

1. Can we get a copy of the AR for OU1 – what do we say?
2. Can we share the documents included in the NOID package prior to the comment period – like now so they can see them?
3. What are all the pieces of evidence that led us to conclude that the lead and/or arsenic was in the top two inches and dissipated quickly at depth?
